This project is funded under a Grant Contract with the
State of Tennessee.

Our mission is to remove barriers to contraception through education, outreach, and access to birth control to any individual living in our tri-state, 18-county service area who wants it, for FREE!

Every person has a right to achieve their big goals — at work, at home, in their relationship — but sometimes accessing birth control is harder than it needs to be. We believe contraception should be available to anyone who needs it.

PILLARS OF OUR MISSION

EDUCATION

Providing factual information that increases knowledge and awareness of preventative birth control

OUTREACH

Working with partners, volunteers, and leaders to share our resources and make information about reproductive health more accessible

ACCESS

Connecting individuals to free preventative contraception on their terms
